Mini Rack-N-Stack Assembly

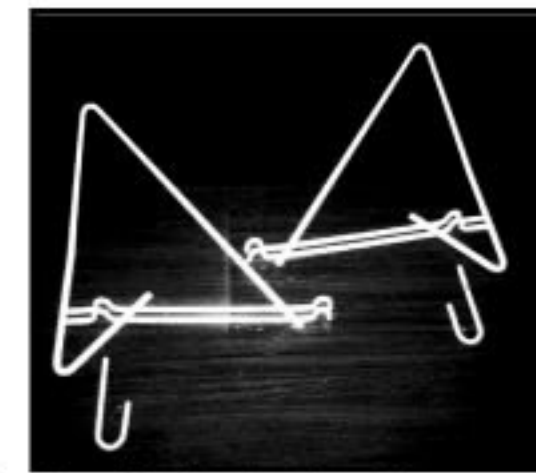

Box Contents

3 Bottle Cradles

1 Back Frame

2 Left/Right Leg and
2 "U" Hook

Assembly Instructions

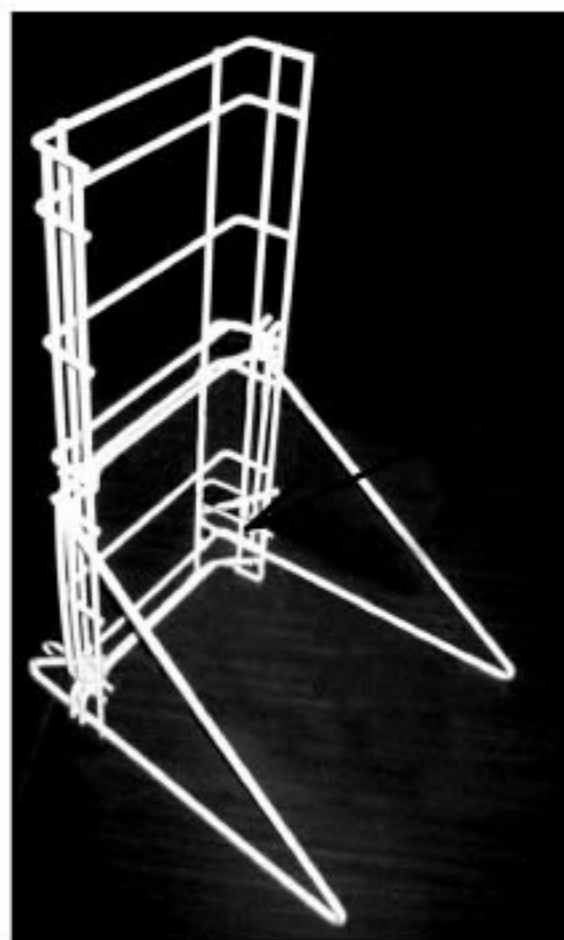

Figure 1

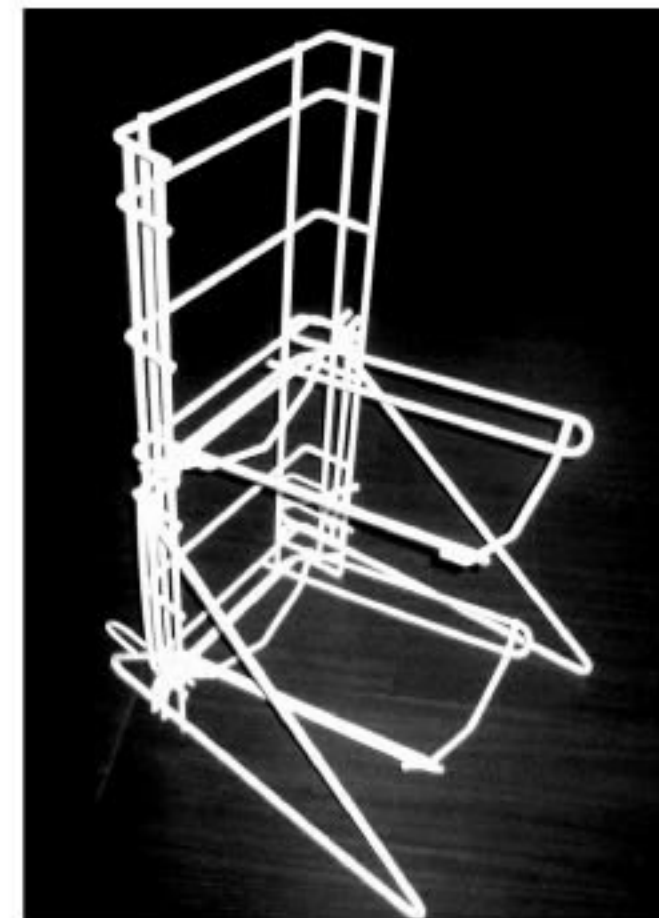

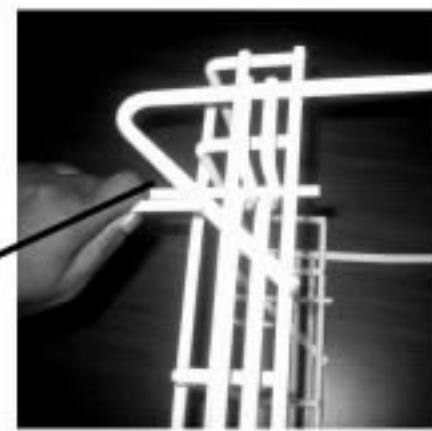

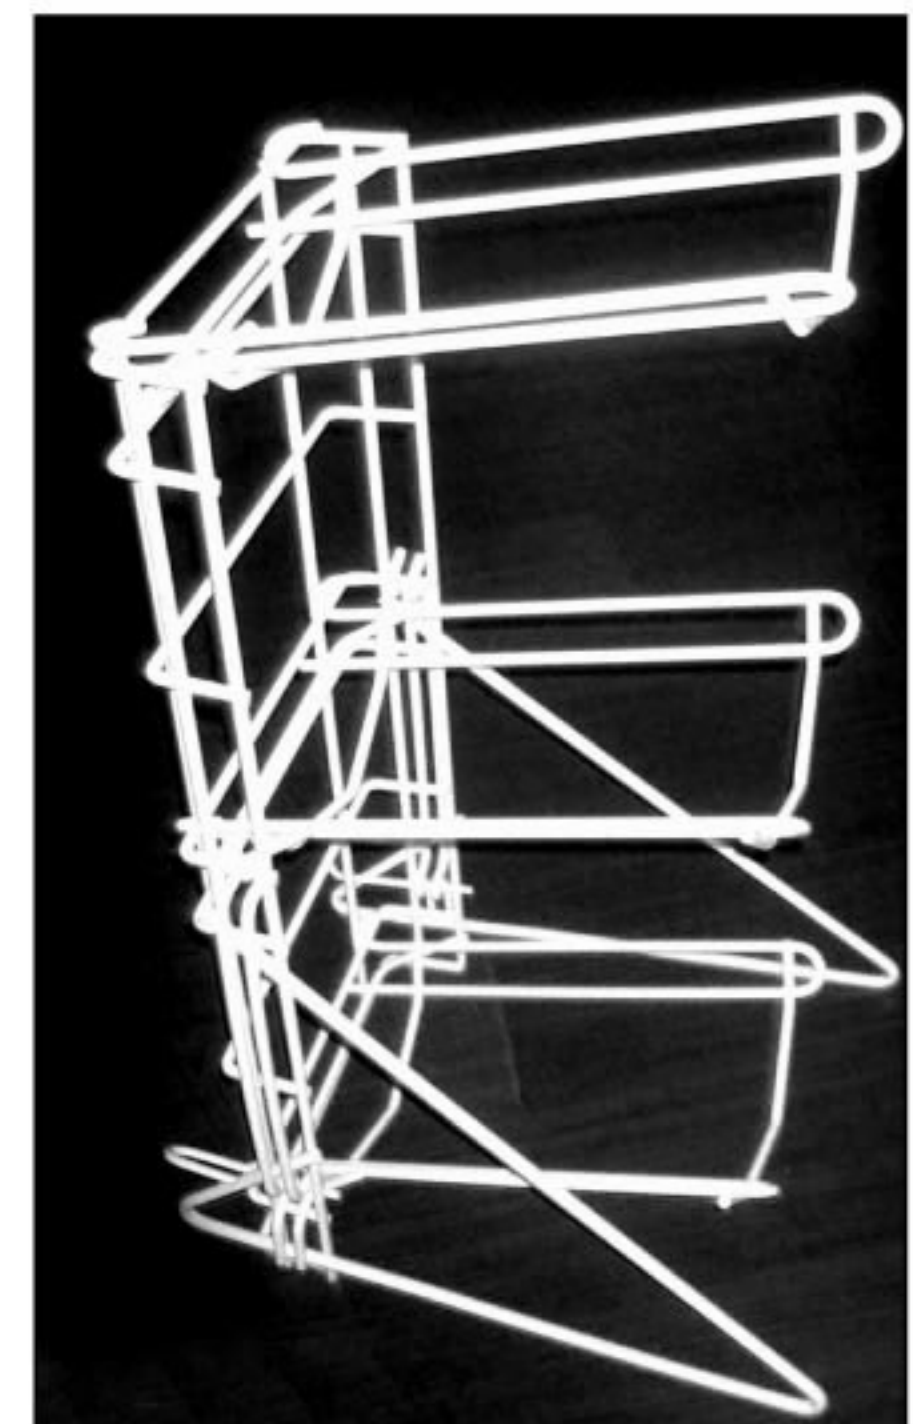

Figure 2

1. Locate Back Frame, and left leg. Notice the "U" shaped hook forms at the top of the leg assembly, position the "U" hook through the 3rd and 4th horizontal cross wires hooking over the 4th wire and then pressing down with constant pressure so lower "U" shapes passed through the two vertical side frame wires and then secure by passing pin through "U" bends. Repeat for right side. See photo.
2. Attach top bottle cradle by passing the "U" hook shape end wires between the top two horizontal cross wires so end of wire passes over top wire and cradle rests against back of frame. Repeat for other 2 cradles. See photos.

Rack is now ready to load. Any questions, please call Houston Wire Works at 281-335-5800

**Fully Assembled
Mini Rack-N-Stack**

Warning!

Failure to assemble rack properly, may cause serious injury.
